DAIKEN CORPORATION

Corporate Message

# Toward the future going beyond the functions of yesterday

Since its establishment, the Daiken Group has developed a multitude of products by capitalizing on limited resources and listening to our customers' needs. Today we have evolved into a company where our efforts have accrued to provide first rate building materials and comfortable spaces for our customers. We will continue to strive towards a sustainable future where people can enjoy pleasant living spaces and lead spiritually rich lifestyles. In pursuit of new possibilities, we will transcend the past by developing innovative functions towards a brighter tomorrow.

#### ■ Editorial Policy

The Daiken Group previously issued the CSR Report to better communicate with our stakeholders about the Group's general management and corporate activities with a focus on its approach to corporate social responsibilities. The Group updated the CSR Report in fiscal year 2016 and issued a Daiken Group Report. We hope that the report clarifies the corporate value and growth potential of the Daiken Group. In addition, the website offers the Group's initiative on CSR and environment data in detail.

#### ■ Eligible period:

Fiscal 2017 (April 1, 2016, to March 31, 2017)

\*Some contents include information other than the relevant fiscal year.

#### ■ The scope of report:

Daiken Corporation and Daiken Group

\*The performance data for safety, health, and environment differs in scope.

#### ■ Issued in

September 2017

# Businesses and Characteristics

## Toward an all-embracing company for building materials that support the social infrastructure of houses, buildings, and facilities.

Building materials are indispensable to the various buildings that shape our lives. The Daiken Group provides a wide range of building materials that ensure safety in various buildings and create comfortable spaces. With unique ideas and technologies, we create multifunctional building materials to realize safe, reliable, healthy, and comfortable lives while developing and using materials originated from wood resources, mineral resources, and Japanese paper (washi). Furthermore, we also engage in installation work and the creation of spaces to maximize the functions of our building materials. Aiming to be an all-embracing company for building materials and to play an active role in more fields than homes, which has been our main business domain, to public spaces and commercial facilities, we will continue our challenge to create the products and services needed by society.

# Building materials

business

## Developing and providing building materials best suited for the interior of various buildings

Provides a wide variety of highly functional building materials that form safe, reliable, healthy, and comfortable spaces, including floors, walls, and ceilings to doors, cabinets, stairs, and acoustic products for homes and public spaces and commercial facilities.

# Process of Creating Value

Daiken Group capitalizes on its business and unique strengths to deliver new value to society.

To make a sustainable society a reality, corporations must meet various social challenges and needs. The Daiken Group capitalizes on its unique strengths to promote business activities in consideration of social challenges and needs. The Group is striving to create new value that responds to every need by contributing to solving problems.

In addition to catering to social challenges and needs, the Daiken Group aims to conduct business activities with CSR management as the foundation. The Group is aspiring to create new value and realize its long-term vision (the Daiken Group's goal).

# Management Policy

Aiming to make the new group corporate philosophy a reality, the Daiken Group will promote CSR management from a long-term point of view.

Since the long-term vision GP25 was established in 2015, the Daiken Group has been promoting a growth strategy aimed at becoming an all-embracing company for building materials according to the GP25 1<sup>st</sup> Stage in its Medium-Term Management Plan from 2016. In April 2017, the new Group Corporate Philosophy was formulated to address stronger management toward sustainable improvements in our corporate value and philosophy.

## The system of practicing the group corporate philosophy

## Key points of the long-term vision, GP25 (GROW/GLOW PLAN25)

The Daiken Group celebrated the 70<sup>th</sup> anniversary of its founding in 2015. In that milestone year, the Group formulated GP25 (GROW/GLOW PLAN25 (GP25), the long-term vision for its business in 2015 to be achieved by 2025. The plan GP25 sets the Group's vision for the future (corporate vision) of transforming from a housing materials manufacturer to an all-embracing company for building materials. For us to grow and glow, The

Daiken Group not only the pursuit of profit, but must also be committed to improving society. We seek to be an enterprise that people value highly for an attractive working environment and as a place where employees can work confidently and enthusiastically. We will work together to achieve our objectives by anticipating changes in the business environment and continuing to accept the challenge of offering new value to customers.

The Group will work to transform into an enterprise that meets the expectations of customers and markets while contributing to a better society.

**GROW**

**GLOW**

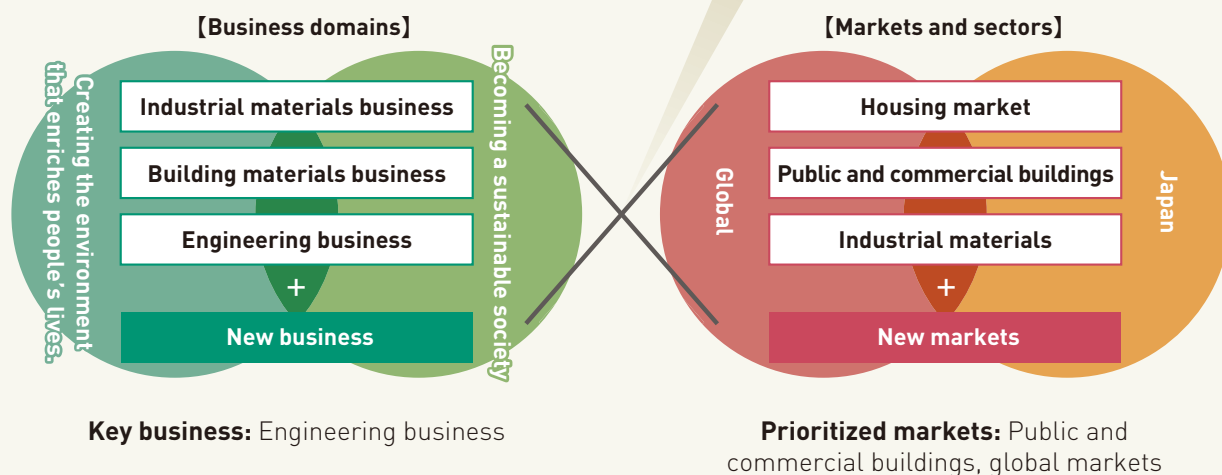

The Group will work to become an enterprise that people rate highly for its attractive working environment and as a place where employees can work positively and enthusiastically.

## Key points of the Medium-Term Management Plan, GP25 1st Stage (for fiscal 2017-2019)

The Daiken Group began the GP25 1<sup>st</sup> Stage in April 2016, in its Medium-Term Management Plan, which we regard as a first step in achieving a long-term vision GP25. Under this plan, the Group has set the management target an ordinary income of ¥7.0 billion on net sales of ¥180.0 billion, operating profits of ¥7.0 billion, ¥4.3 billion for profit attributable to owners of parent and 8% or higher of ROE by fiscal 2019, the final year in the first stage of the plan.

The largest mission in the GP25 1<sup>st</sup> Stage is to lay the foundation for transforming into a housing material manufacturer to an all-embracing company for building materials. To make these a reality, the Group has completely reviewed its policies and activities, laid out a strategy that includes both a business and a market point of view, and identify major issues and determine resolutions. We have been carrying out these approaches steadily.

## The first step toward an all-embracing company for building materials

# Message from the President

Masanori Okuda  
Representative Director,  
President

# Aiming to become an all-embracing company for building materials, the Daiken Group is up for the challenge for new markets and business sectors.

## General overview of business results and key initiatives for fiscal 2017

Under the Medium-Term Management Plan, GP25 1st Stage, the Group embarked on new challenges in a variety of sectors.

---

While the house construction sector for fiscal 2017 lost momentum in the second half of the fiscal year, the rental-housing sector sustained strong performance. The owner-occupied houses, including built-for-sale houses, also maintained high-level growth. For the public and commercial buildings, private construction contracts, mainly lodging facilities and retained premises, increased steadily.

Under such business circumstances, our Group embarked on a three-year Medium-Term Management Plan, titled GP25 1st Stage, from 2016, with the goal of achieving the vision for 2025 as a first step toward realizing the long-term vision of GP25.

In the home renovation market, the Daiken Group opened two new showrooms jointly with TOTO Ltd., and YKK AP Inc., to expand the platform for showcasing products, as well as to improve the lineup of renovation products. In addition, the Group entry into the condominium renovation market.

In the public and commercial buildings market, we launched new products that highlight Daiken's strengths of

sound insulation and local Japanese wood, building a track record in the domestic market. As for global markets, the Group expanded distribution of MDF in North America and Southeast Asia. In addition, the interior door plant in Indonesia went into full operation as a supply system for the country and surrounding countries.

To further renew our efforts, Daiken began reviewing the comprehensive commercial use of wood building materials, encouraging the use of cascading. Additionally, the Okayama plant began full-scale operation of a wood biomass boiler, which uses wood chips as fuel. This reduces the environmental load and energy costs while increasing productivity.

Consequently, net sales for fiscal 2017 increased to ¥168,848 million (up 0.4% year-on-year), operating income was ¥8,515 million (up 52.4% year-on-year), and ordinary income was ¥9,021 million (up 70.8% year-on-year) with profit attributable to owners of the parent at ¥5,116 million (up 28.3% year-on-year). The Daiken Group achieved record net profits since consolidation.

## Forecast for the market environment and financial results for fiscal 2018

The Daiken Group will capitalize on its unique technologies and expertise to expand profits with high-value added products.

---

The Japanese housing market in fiscal 2018 is expected to come to a temporary standstill because of the postponement of an increase in the consumption tax and ongoing low-interest mortgage rates, causing consumers no rush into home buying and renovations.

Based on these market environment, the Daiken Group will continue to inject corporate resources into the home renovation market, public and commercial buildings market, and the global markets, which are prioritized in the first stage of GP25. The Group will further promote

initiatives in each sector in order to strengthen management practices and not rely solely on housing starts. The task for the moment is to further promote streamlining and focus on sales of high-value added products by capitalizing on the Group's unique technologies and expertise to increase profits.

As for the forecast of financial results for fiscal 2018, we anticipate net sales of ¥173.0 billion, operating income of ¥8.7 billion, ordinary income of ¥9.2 billion, and the profit attributable to owners of the parent of ¥5.6 billion.

## Medium-Term Policy and Strategy

The Daiken Group is transforming its business structure in preparation for decreased domestic housing starts in the future.

In the home renovation market and amidst the increased importance of stock homes, we aim to further strengthen comprehensive proposal services of eight showrooms across the country, which we jointly operate with our business partners, TOTO Ltd. and YKK AP Inc., in the renovation sector. In addition, we will

expand sales of new commercial products designed for easy renovation over existing flooring without nails and adhesive. By maximizing the synergy effect with Mansion Renovation Company, Daiken will develop laborsaving installation products.

In the public and commercial buildings market, Daiken will actively propose our uniquely developed, easy-to-maintain tatami mats with excellent durability to lodging facilities and Japanese restaurants to meet the expansion of domestic demand. For high-end hotels, we propose wooden floors with durability and excellent sound insulation developed to reduce footstep sounds.

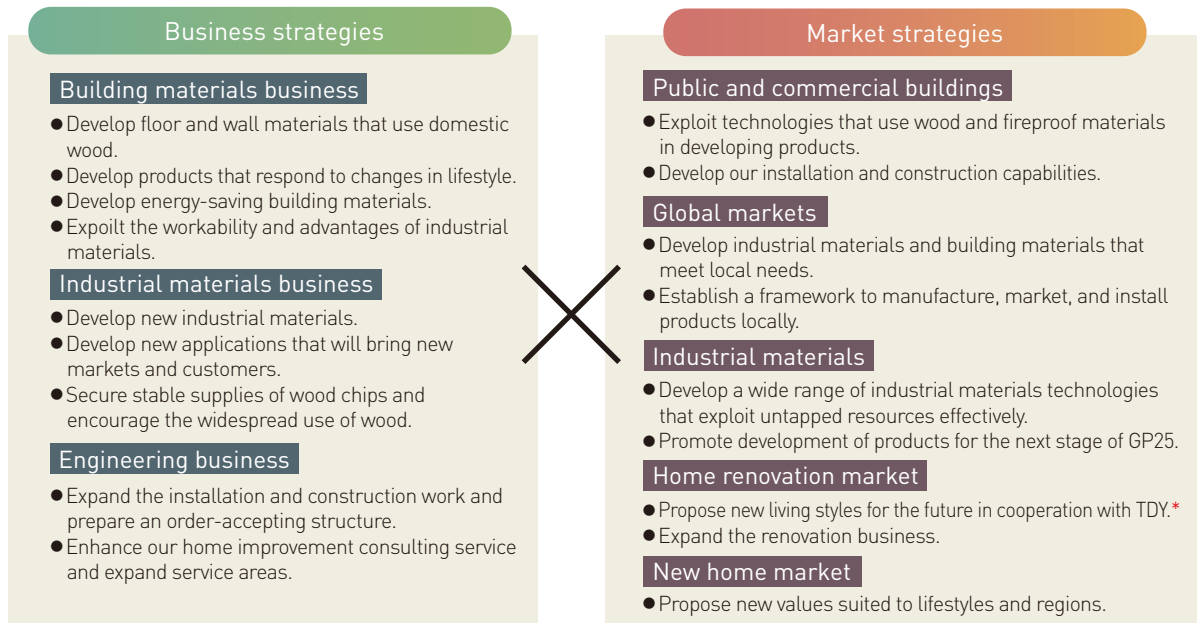

On the other hand, the Daiken Group will promote the use of local domestic wood as part of a national policy and propose the use of domestic wood to local governments to meet their needs. Daiken products made with local domestic wood have been widely introduced at Toyama Station on the Hokuriku Shinkansen Line and Kurobe-Unazuki Onsen Station, as well as libraries and schools in many areas. The application has been expanding across

### Management goals of the Medium-Term Management Plan

(¥million)

	Fiscal 2017 (results)	Fiscal 2018 (forecast)	Fiscal 2019 GP25 1st Stage Final year

ROE (%)	11.7%	—	8% or higher

### Strategy of the Medium-Term Management Plan, GP25 1st Stage (for fiscal 2017-2019)

the country. The Group set up a supply structure for 29 prefectures with a plan for expansion into more locations.

For global markets, Daiken intends to expand the structure of local production and sales. For the Southeast Asian market with its ongoing economic progress, we will proceed with an expanded production and supply system at a fast pace to meet the needs for

both quantity and quality. For Indonesia, in particular, the installation and sales company established earlier will be enhanced by a Japanese quality production, sales, and installation system in its new interior door plant, which went into full operation in fiscal 2017, with the aim of expanding operations in the country.

## Our approach and efforts in CSR

### The Daiken Group will enhance its environmental efforts and focus on creating a fulfilling work environment.

The Daiken Group considers CSR as the foundation of business. For Daiken to continuously develop into a corporation supported by customers and society, it is essential to address CSR strategically by comprehensively capturing the aspects of ESG. Through efforts for the basic policy of ecology and qualitative improvement of spaces, Daiken is pledged to create common value with society. As part of the efforts to realize a sustainable society, Daiken is committed to products made from eco-friendly, ecological based materials designed for high-quality space from the viewpoint of consumers to meet social expectations and demand.

Daiken believes that the source of corporate growth is human resources. As part of its corporate responsibility, the basic policy of

the Medium-Term Management Plan includes the creation of a fulfilling work environment and the use of the skills of diverse human resources, including non-Japanese, women, and skilled employees. In particular, Daiken considers the change in workstyles an urgent issue. We will crystalize company-wide measures by centering on the company-wide workstyle change project. In addition, to reduce working hours, each employee needs to become more creative and skillful. To that end, the Daiken Group will grant self-improvement incentives to all employees with a summer bonus for fiscal 2018. Daiken will boost self-investment for each employee by encouraging personal growth for the future.

## Message to stakeholders

### Under the new group corporate philosophy, the Daiken Group is pledged to improving corporate value with employees as a whole.

The Daiken Group established its group corporate philosophy in April 2017.

With the advancement of globalization and diversifying human resources in recent years, the Daiken Group needs to share a common mission, vision, and values as a corporation to match the direction for further growth. We established the group corporate philosophy by evolving the management philosophy with the wish to making it a reality with all group employees. The Group Corporate philosophy consists of three elements of "Our Mission," "Our Vision," and "Our Values" to indicate the direction of

the Group in the future.

While our long-term vision GP25 is a milestone toward 2025, the group corporate philosophy anticipates the 100<sup>th</sup> anniversary, of its founding in 30 years later. The Daiken Group will remain an appreciated corporation that contributes to future happiness even after 30 years. Group employees are committed to working as one to make efforts that will result in sustainable improvements in corporate value. Daiken appreciates its stakeholders' continued understanding and support of the Group.

Changes in net sales

Down **2.6%** period-over-period

Changes in ordinary profit

Up **44.4%** period-over-period

\*Besides the above, other businesses account for 6.8%.

---

## Summary of business results for fiscal 2017

We developed a new construction method for flooring and storage that featured labor-saving installation and started proposing this in the home renovation market. For the public and commercial buildings, we proceeded with proposals on products that suited the needs in the buildings, such as flooring for lodging facilities like hotels and doors for nursery schools and day-care centers for children.

Consequently, we increased profits as we recorded net sales of ¥87,268 million (up 1.2% year-on-year). In the aspect of profit, as we steadily proceeded with the switch to our leading interior finishing products that we drastically revamped in 2015, in addition to various kinds of streamlining to maintain our profitability in the second half of the previous period, we recorded ordinary profit of ¥4,551 million (up 10.6% year-on-year).

## Forecast, targets, and policy for fiscal 2018

In fiscal 2018, the building materials business is forecasted to post ¥89,400 million. While further penetrating into the existing market, we will also focus on the expansion of sales volumes in the public and commercial buildings, which is our prioritized market. We will enhance propositions on a new product that we launched in the market in June 2017 and expand it in a wide variety of markets, such as welfare facilities for the elderly, public facilities, educational facilities, and lodging facilities.

---

## Summary of business results for fiscal 2017

Shipments of our original tatami facings using machine-made Japanese paper to hotels and Japanese inns increased and the sale of MDF expanded because of the development of covering flooring surface by decoration sheets. We also released non-combustible decorative wall materials and eave soffit materials by making use of the characteristics of our original inorganic material Dai-Lite.

Consequently, net sales slightly increased to ¥56,410 million (up 0.1% year-on-year). On the other hand, we achieved a significant increase in profit as ordinary profit was ¥3,726 million (up 358.4% year-on-year), which was four or more times larger than a year earlier due to the effects of our efforts made in optimizing production efficiency, such as reviews on the production items in each base, in addition to raw material and energy-related cost reductions and posting of the repair cost for the partial product deficiency in the previous period.

## Forecast, targets, and policy for fiscal 2018

In fiscal 2018, the industrial materials business is forecasted to post net sales of ¥55,700 million. As for housing starts, although we assume it will be in the same level as that of two fiscal years ago, we will proceed with the transformation of our business structure to be less affected by changes in the number of housing starts by expanding and strengthening our response to public and commercial buildings and focusing on the development of functional and distinguished products in the global markets.

---

## Summary of business results for fiscal 2017

In the engineering business, domestic construction work steadily grew but we had a hard time because the demand for interior work centered on the condominium market did not increase.

Consequently, the engineering business saw a decrease in net sales and recorded net sales of ¥13,612 million (down 2.6% year-on-year) in this period. On the other hand, in terms of profit, we saw an increase in profit and recorded an ordinary profit of ¥335 million (up 44.4% year-on-year) as we worked to improve profitability by securing skilled workers and enhancing the management system at each site as the countermeasures for soaring construction cost due to the shortage of skilled workers.

## Forecast, targets, and policy for fiscal 2018

In fiscal 2018, the engineering business is forecasted to post net sales of ¥16,900 million. We will continuously expand our interior work in the metropolitan area, which has strong demand for construction, and begin full-fledged development in the condominium renovation business.

# Initiatives for Priority Areas

## Public and commercial buildings

We offer a wide range of products from flooring, wall materials, ceiling materials, doors, and tatami mats, which are intended for office buildings, public and commercial facilities, educational facilities, and lodging facilities.

### Sales plan

### Strengthening wall material businesses

We propose wall materials using Dai-Lite, our unique non-combustible base material, to be applied to spaces in various public and commercial facilities such as lodging facilities, offices, stores, kindergartens, and nursing schools. We also develop and propose products intended for public facilities that make effective use of domestically or regionally produced woods as surface material, as well as office products for improving the sound environment in conference rooms.

Non-combustible wall material Gravio

### Increasing the choice of doors for use in various facilities

We are expanding the Daiken Omoiari (or Caring) series, a series of door products implementing universal design, such as barrier-free and antivirus features. The Omoiari kids' door is intended for kindergartens and nursing schools where safety is a consideration by incorporating a mechanism for preventing fingers from being caught and where corners are rounded by machining. We offer a wide variety of products intended not only for above facilities but also for welfare facilities for the elderly and commercial facilities.

Omoiari kids' door

### Expanding flooring with superior durability

Using our unique WPC technology that injects a plastic into the cavities of wood material for hardening, we developed flooring that can be used with shoes on and are equipped with resistance to damage and water while maintaining the beauty and texture of natural woods. We have received many inquiries for general-use type "Communication Tough" and sound-proof type "Communication Tough Soundproof" from lodging facilities, stores, kindergartens, as well as public facilities.

"Communication Tough"

## Proposing spaces that utilize domestically or regionally produced woods

From February 2017, we are selling the "Wood cube", a wooden space that can be installed without the need for complicated work for fixation to secure the construction body and that makes effective use of domestically or regionally produced woods in limited large urban areas. We are actively proposing this product as a method of using domestically or regionally produced woods, whose promotion of use is required.

"Wood cube"

## Expanding sales of tatami facing that is resistant to damage and dirt

Our uniquely developed "Sukoyaka omote", which uses machine-manufactured Japanese paper (washi) as raw material, is resistant to water and the generation of mites and mold. The tatami facing has also high scratch resistance. It has earned a high reputation from hotels and Japanese inns for its easiness of creating a relaxing Japanese-style environment suited for inbound. We also offer a model with fireproof feature and a model that can be easily placed in a part of wood flooring.

"Kokochiwaza" Placement-type Seiryu (fireproof)

## Topics Supporting the use of domestically produced woods using technologies

### ■ Increasing the durability of domestically produced woods with unique wood-processing technology

By increasing the hardness of soft domestically produced woods with Daiken's unique WPC processing technology that enable to use them as flooring even in facilities where shoes are put on without worrying about damages and dirt.

#### <Comparison of a flooring made by WPC and general flooring>

##### General flooring

The surface is easily damaged.

##### WPC flooring

The surface is hard and resistant to damages.

### ■ "Dai-Lite", non-combustible base material made from Shirasu

"Dai-Lite" which is light in weight and has superior fire resistance and workability is used in a wide range of facilities as a non-combustible wall material with domestically produced woods for its surface material.

#### <Characteristics of Dai-Lite>

##### Non-combustibility

The non-combustibility that has certified by the Minister of Land, Infrastructure, Transport and Tourism can be safely used in wood environments where there are limitations for interior design.

##### Lightweight

The weight of Dai-Lite is two-thirds of general melamine board. It contributes to reducing the burden on workers installing the product even in work at height.

##### Workability

The lightweight and flexible base material can be easily cut by a handsaw or cutter knife, thereby realizing labor-saving installation.

# Initiatives for Priority Areas

## Global markets

We will continue to develop industrial materials and building materials that match local needs in Asia while building systems for on-site production, sales, and installation.

### Sales plan

Up **4.7%** year-on-year 

## Expanding door business with a new factory in Indonesia

In August 2016, the newly established production base for interior doors in Indonesia started operation. In Indonesia, where we put particular emphasis in ASEAN region, we built a base in Jakarta in 2012 and started marketing activities. In January 2014, we established a joint venture specialized in installation and sales of interior building materials. From then on, we formed a sales base while making efforts to be differentiated from competitors through high-quality installation control.

With the launch of new factory, we will actively make proposals not only to Japanese developers and house makers expanding businesses in the Indonesian markets but also local developers, aiming to expand operations in the area by providing a total business from product supply through installation.

## Topics Global network of the Daiken Group

Our global production factories are located in China, Malaysia, Indonesia, and New Zealand. Our sales operations sites are mainly located in Asia (China, Singapore, Malaysia, and Indonesia) where economic growth has been remarkable.

Under thorough quality control systems, each site realizes a stable supply of wood products to overseas destinations including China, Southeast Asia, Europe, and the United States, in addition to Japan.

MDF

## Expanding sales of MDF

The MDF wood fiberboard is manufactured by processing wood chips into fibers, adding adhesive, and then processing it into board-shaped products. Tropical broadleaf trees and the needleleaf *Pinus radiata* are used for raw materials. We produce MDF with various characteristics by using different trees and adhesives.

Our lightweight MDF is superior in quality stability and water resistance compared with other wooden base boards manufactured overseas (plywood, particleboard, and OSB). By taking advantage of these features, we continue to promote the product and expand sales not only in Southeast Asia but also in North America and other regions.

DAIKEN NEW ZEALAND LIMITED

# Initiatives for Priority Areas

## Home renovation market

We will continue to propose new living styles for the future through cooperation among TDY, while developing products dedicated for apartment renovation for the expanding home renovation market.

**Sales plan**

Up **8.3%** year-on-year 

### Strengthening connections with customers through expansion of TDY collaboration showrooms

On July 3, 2017, we will open the TDY Sapporo Collaboration Showroom in cooperation with TOTO Ltd. and YKK AP Inc. in the area adjacent to Sapporo Factory, a large commercial facility located in Sapporo. This is the eighth showroom jointly operated by the three companies (TDY) in Japan and the first in Hokkaido.

Although we have jointly operated showrooms with TOTO Ltd. in the Sapporo district since August 2009, with YKK AP Inc. newly participating the project, the showroom jointly operated by three companies will have a larger scale.

From now on, we will continue to strengthen the showroom's capabilities of exhibiting of spaces and consultation, and propose more comfortable and enjoyable lifestyles to our customers.

**TDY Collaboration Showroom**

Appearance of TDY Sapporo collaboration showroom (image)

## Full-scale development of apartment renovation business

In October 2016, through the acquisition of Pac System Co., Ltd., which operates the apartment renovation business in the Kanto region, we entered the apartment renovation business. While Daiken Home & Service Corporation, our affiliated company, had conventionally undertaken relatively small-scale renovation work for detached houses and apartments, with the participation of Pac System, which specializes in relatively large-scale repair projects, and members of the group, we will endeavor to expand our engineering business in the home renovation market, while developing products and methods used for renovation in building materials business.

Web site of Pac System Co., Ltd.

## Topics Developing industry's first flooring that can be installed by sticking on the floor

Daiken Corporation developed self-adhering flooring, the industry's first flooring for the renovation of houses that can be stuck on the floor. The product has been available on the market since June 2016. Unlike conventional flooring, you can easily install it by placing and sticking onto the floor without using nails or adhesives. It enables to reduce the construction period and the total costs but

also allow users to perform installation by themselves.

Moreover, as it is stuck onto the existing wood flooring or cushion floor, restoration of the original state is also easy. Another key feature is that it can be employed in the renovation regardless of leasehold properties, owned houses or housing complexes, which makes the product suited for various renovation needs.

You can easily fix the self-adsorption surface onto the base material by peeling the clear film from the back and pressing down onto the surface.

The product is compact with dimensions 150 mm x 900 mm and can be installed even in a single sheet.

# The Daiken Group's CSR

## CSR Basic Policy

### Vision

---

Contribute to the realization of a sustainable society by creating values shared with society through activities for “Ecology” and “Improvements in the quality of space”

### Policies

---

- 1 With CSR and CSV\* as the key axes, we will improve our corporate value and enhance our competitiveness to realize GP25.
- 2 Using CSR as an activity to enhance our ability to respond to and earn the trust of society, we will systematically pursue CSR with our responses to the environment, society, and governance as key axes.
- 3 Positioning CSV\* as one of our management strategies, we encourage activities voluntarily and actively through the whole business process.

\*Daiken's CSV is defined as *finding solutions to social issues through the provision of common values capitalizing on Daiken's uniqueness.*

### CSV Theme

---

- 1 Building a sustainable society
- 2 Providing secure, safe, and comfortable spaces
- 3 Comprehensive use of wood building materials—encouraging the use of cascading

The Daiken Group formulated its Medium-Term CSR Activity Plan (for fiscal 2017-2019), as a medium-term plan to push forward with the long-term vision GP25 in stages.

We incorporate the concept of creating shared value (CSV) into our conventional CSR activities, apply specific initiatives in the Medium-Term Management Plan and management policy for the fiscal year as the CSV activity themes, and promote them on a group-wide basis.

### Medium-Term CSR Activity Plan (for fiscal 2017-2019)

- This action plan stipulates activities to promote compliance and other basic CSR activities on a group-wide basis.
- Based on the core subjects of ISO 26000, key items and initiatives to be addressed are extracted for each of the following six themes: (1) organizational governance, (2) human rights, (3) labor practices, (4) fair operating practices, (5) consumer issues, and (6) community involvement and development.
- Our flexibility is enhanced by just expressing the medium-term targets in broad and qualitative terms.
- Based on this plan, each CSR promotion department will design and implement its own plan for specific activities.
- In the environmental area, we need to set out more technical and specific contents in an activity plan. We have therefore formulated our Medium-Term Environmental Plan separately.

### The 5th Medium-Term Environmental Plan (for fiscal 2017-2019)

- This activity plan is specifically designed for the environment. The 1st Medium-Term Environmental Plan was formulated in 2002.
- Before determining activity themes, their priorities were defined based on the results of evaluating the impact these activities have on the global environment, society, and management (risks and opportunities).
- Based on this action plan, each department will establish and implement its own targets and specific plans for each period.

### CSR Activity Promotion System

# Medium-Term CSR Activity Plan

## Status of the Medium-Term CSR Activity Plan (for fiscal 2017-2019)

Major CSR activity plan and its results in fiscal 2017 and the major activity plan in fiscal 2018

	Key items	Plan for fiscal 2017	
<b>Management area</b>	<b>CSR management</b>	<ul style="list-style-type: none"> <li>Promote company-wide CSR activities led by the CSR Committee.</li> </ul>	<ul style="list-style-type: none"> <li>Confirm progress in CSR activities.</li> <li>Maintain management philosophy and disseminate it group-wide.</li> </ul>
	<b>Risk management</b>	<ul style="list-style-type: none"> <li>Develop, update and manage business continuity plans (BCPs).</li> </ul>	<ul style="list-style-type: none"> <li>Confirm progress.</li> </ul>

# Governance

## Basic Approach

In pursuit of optimal corporate governance that will result in sustainable improvements in our corporate value.

Under the group corporate philosophy, we are committed to sustainable improvements in corporate value for all shareholders and stakeholders.

In order to achieve efficient, sound, and transparent management, we take the basic approach that always seeks to

optimize corporate governance and constantly works to improve it. Based on the basic policy on corporate governance established in 2015, we are making constant improvement to respond to ever changing business environment surrounding the group in ceaseless pursuit of optimal corporate governance system.

## Key initiatives for the reinforcement of corporate governance.

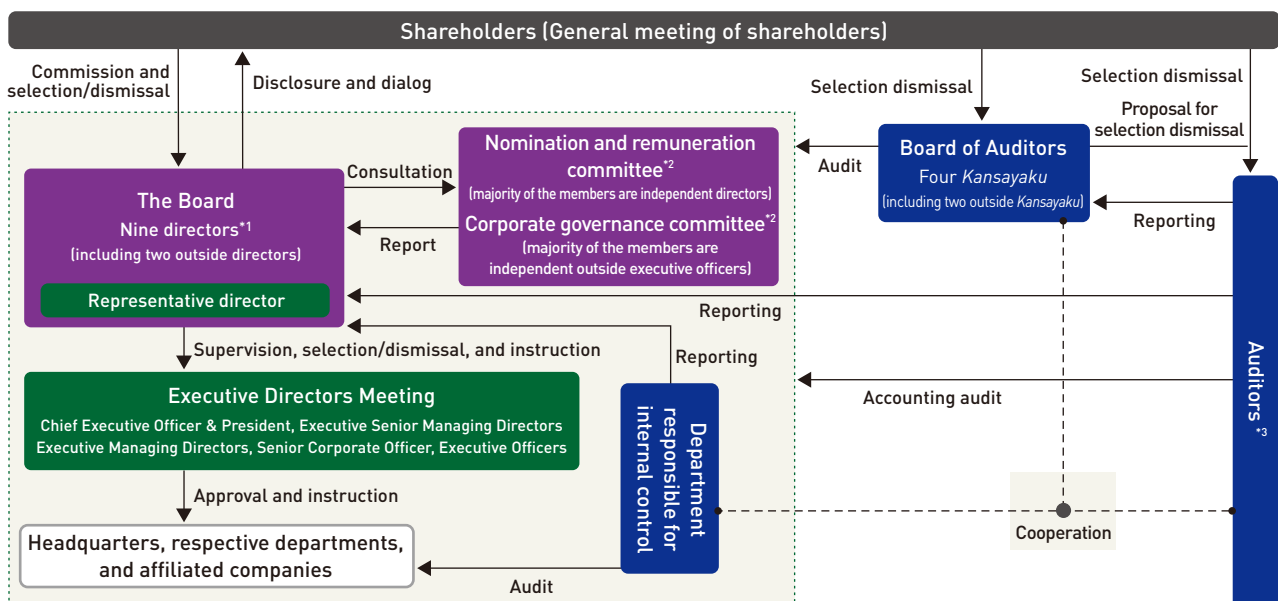

- 2002: Made the shift to the chief executive officer system.
- 2003: The Compliance Committee was established.
- 2008: Reorganized to the Risk & Compliance Management Committee for reinforcement.
- 2010: Reduced the number of directors from 11 to 9.
- 2011: Outside directors are selected.
- 2012: The term for the Board is reduced from two years to one year.

- 2015: Outside directors increased from one to two. The Basic Policy on Corporate Governance was established. The Nomination and Remuneration Committee and the Corporate Governance Committee were established.
- 2016: The effectiveness evaluation of the Board was implemented.

## Governance System

Governance System aims for sustainable improvements in our corporate value.

### The Daiken Group's Corporate governance framework

■ Monitoring, supervising, and important decision-making ■ Auditing ■ Business execution and decision-making □ Business execution

\*1 The term for directors is one year.

\*2 The nomination and remuneration committee and the Corporate Governance Committee are set up as an arbitrary advisory committee for the Board. The nomination and remuneration committee nominates directors, executive officers, and *Kansayaku* candidates and discusses remuneration for directors and chief executive officer. The corporate governance committee implements effectiveness evaluation of the governance system and the Board and discusses related items.

\*3 Auditors are Gyosei & Co.

## Selection of independent directors

Based on the independence standards Daiken Corporation has established for judging whether an outside director or *Kansayaku* is independent or not, we report our independent directors to the Tokyo Stock Exchange to ensure transparent and fair company management. We have selected two independent directors (out of a total of nine directors) and two independent outside *Kansayaku* (out of a total of four *Kansayaku*.)

Independence Standards	*The eligible term of office: The term of office for the below No. 1 is current or in the past without term of office, and the term of office the below No. 2 to 6 is current or the past five years.
<p><b>1. Relevant persons of the Daiken Group</b></p> <p>The persons shall not be a director (excluding its outside director), <i>Kansayaku</i> (excluding its outside <i>Kansayaku</i>), accounting advisor, executive officer, corporate officer, or employee (hereinafter collectively referred to as "directors, etc.") of the Daiken Group, its subsidiaries and affiliates (hereinafter referred to as "the Group, etc.")</p>	
<p><b>2. Relevant persons with voting power</b></p> <p>I. The persons shall not be a shareholder or director, etc., with 10% or higher voting power for the Group.</p> <p>II. The persons shall not be a director, etc., of a company in which the Group possesses 10% or higher voting power.</p>	
<p><b>3. Relevant persons of business partners</b></p> <p>I. The persons shall not be a director, etc., of a business partner, which the Group does business with for the equivalent amount of 2% or higher consolidated net sales or purchase for either of the companies.</p> <p>II. The persons shall not be a director, etc., of a primary financial institution, which the Group borrows the equivalent amount of 2% or higher of the Group's consolidated assets.</p> <p>III. The persons shall not be a director, etc., of the Group's lead brokerage.</p>	
<p><b>4. Experts (lawyer, certified public accountant, consultant, etc.)</b></p> <p>I. The persons shall not be a certified public accountant who is the Group's auditor, an employee, partner, or personnel of an auditing company.</p> <p>II. The persons shall not be a person who receives remuneration of more than ¥10 million annually as a certified public accountant, licensed tax accountant, lawyer, or other consultants besides the remuneration as a director or <i>Kansayaku</i> from the Group.</p>	
<p><b>5. Charitable donation</b></p> <p>The persons shall not be a person who receives a donation exceeding ¥10 million annually from the Group or an executing person.</p>	
<p><b>6. Other</b></p> <p>I. The persons shall not be a family member within the second degree of those listed the above No. 1 to 5 (excluding those who do not hold a key position).</p> <p>II. The persons shall not be a director, etc., of the company where the Group's officers are mutually in place.</p>	

## Convention of the Board and the attendance rate of independent directors

	Fiscal 2016	Fiscal 2017
Number of the board convened	13 times	12 times
Attendance rate of independent outside directors	96%	100%
Takashi Aihara	100%	100%
Koji Mizuno	90%	100%
Attendance rate of independent outside <i>Kansayaku</i>	100%	100%
Akio Hasunuma	100%	100%
Masafumi Inoue	100%	100%

## Convention of *Kansayaku* and the attendance rate of independent outside *Kansayaku*

	Fiscal 2016	Fiscal 2017
Number of Board of Auditors convened	14 times	14 times
Attendance rate of independent outside <i>Kansayaku</i>	100%	100%
Akio Hasunuma	100%	100%
Masafumi Inoue	100%	100%

## Executive remuneration

	Number of persons	Amount of payment
Directors	10	¥227 million
Of them, independent outside directors	2	¥13 million
<i>Kansayaku</i>	4	¥47 million
Of them, independent outside <i>Kansayaku</i>	2	¥9 million
Total	14	¥274 million
Of them, independent outside directors and independent outside <i>Kansayaku</i>	4	¥22 million

The board has formulated detailed rules for determining the remuneration of executive officers. The Representative Director submits a plan to the Nomination and Remuneration Committee, which examines the plan and makes recommendations, based on which results the remuneration is determined. There are two types of standard remuneration for directors: remuneration reflecting their role as directors based on their individual duties (fixed part), and remuneration for their performance based on the Company's performance and each director's achievements in the field for which they are responsible (variable part). The maximum limit for executive remuneration is decided within the range set at the general meeting of shareholders (up to ¥35 million per month for directors, and up to ¥4 million per month for *Kansayaku*). The total remuneration for executive officers is disclosed to the public.

# Governance

## Assessment results for the effectiveness of the Board

To increase the effectiveness of the Board and to improve corporate value, the Daiken Group implemented the analysis and assessment of the effectiveness of the Board in March 2017.

Assessment procedure	Questionnaires were distributed to nine directors and four <i>Kansayaku</i> to survey the effectiveness of the Board, and the answers were collected. The board and the corporate governance committee, in which outside directors and outside <i>Kansayaku</i> make up a majority, conducts analysis and assessment.
Large categories of the questionnaire	a. Roles and responsibilities of the Board b. The composition of the Board c. Deliberation of the Board d. System for promoting dialog with shareholders e. Overall governance system
A summary of the analysis and assessment results	The results confirmed that each director and <i>Kansayaku</i> of the Board are committed to presenting and deliberating their opinions actively while ensuring the fairness and transparency with diverse perspectives and four independent outside directors. The Board maintains the effectiveness of important decision-making in management and supervision of business execution properly. In addition, the assessment revealed that the Board is involved effectively in determining important policies by reviewing the corporate philosophy and conduct guidelines. On the other hand, it also confirmed points to be improved, such as the penetration of management strategy and other key policies within the company, monitoring and supervision of the progress level of key challenges, deepening of discussions about key projects and active information collection of each director and <i>Kansayaku</i> .

**Message from the outside director**

The Daiken Group is committed to transparent management and the maintenance of soundness.

Koji Mizuno  
Outside Director

The Daiken Group contributes to creating safe, sound, and comfortable spaces as a corporation that directly connects to people's daily lives. Since its founding, Daiken has worked to develop products in harmony with the environment as a corporation handling wood materials. I am attracted to Daiken's business that contributes to the environmental conservation. My wish is that Daiken will make a leap forward as an all-embracing company for building materials that makes a social contribution.

In order to make the long-term vision GP25 a reality, it is crucial to execute customer-orientated management without being sidetracked. In addition, while it is necessary to further strengthen corporate governance to ensure transparency and making rapid decisions, I believe the governance system of the Daiken Group is becoming stronger year after year.

As an outside director, I am committed to understanding the environment of the Daiken Group more than ever to actively and freely offer comments to contribute to the sustainable improvement of its corporate value.

**Message from the outside *Kansayaku***

My goal is to reinforce the governance structure to increase corporate value.

Masafumi Inoue  
Outside *Kansayaku*

The Daiken Group has established the group corporate philosophy consisting of Our Mission, Our Vision, and Our Values. All Group employees share the philosophy based on conduct guidelines. The Group is working as one under the Medium-Term Management Plan to achieve the mission to make the long-term vision GP25 a reality.

The Medium-Term Management Plan sets the Group's goals to exploit the public and commercial buildings market and the global markets, as well as to expand the new business domain through investments. Because the new agenda requires the formulation of a better governance system, the Daiken Group aims to further increase corporate value to meet social expectations by monitoring a system where stakeholders can mutually check the key audit items.

In addition, the Daiken Group will focus on the promotion of workstyle changes for employees, which is necessary to achieve these goals.

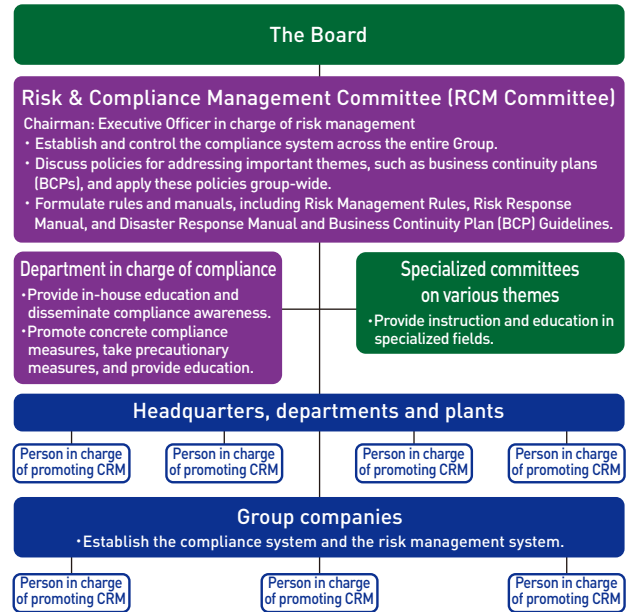

## Compliance/Risk management

### Promotion of Compliance/Risk management.

The Daiken Group has established a Risk & Compliance Management Committee (RCM Committee). With the executive officer in charge of risk management serving as its chairperson, membership includes executive officers in charge of the business administration, sales, and operational and legal compliance fields. The RCM Committee formulates various rules and manuals that enable the management system to function effectively to identify, evaluate and respond to potential risks. It also promotes compliance and risk management throughout the Daiken Group, deliberates on problems, and determines the measures to be implemented to resolve them.

Meanwhile, each subsidiary has assigned a person to promote RCM as part of our compliance and risk management system. The departments in charge of compliance manage compliance measures across the entire Daiken Group, including subsidiaries.

### Compliance/Risk management Promotion System

## Establishing various routes as the whistleblowing contact points

### Enhanced whistleblowing contact points for various harassments.

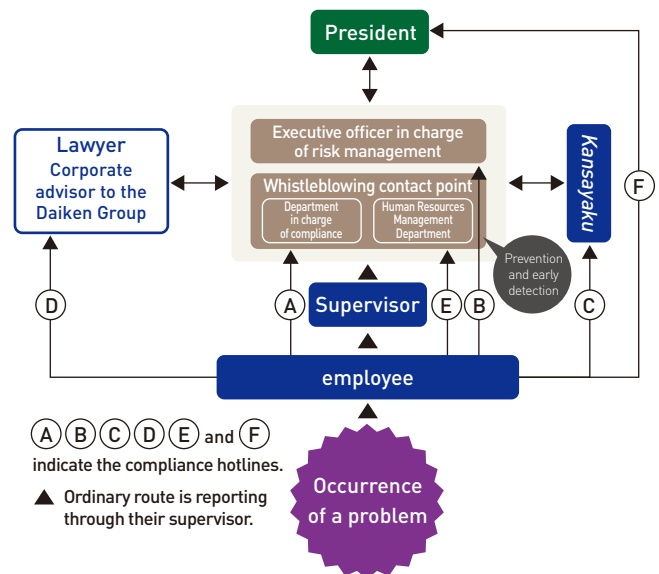

To prevent the violation of laws and company rules in advance and ensure early detection, the Daiken Group has whistleblowing contact points as a direct reporting route in cases where it is difficult to report through regular office organization. In addition, the Group implements measures to ensure that the whistle-blowers will not receive detrimental treatment after reporting.

The following contact points have been added:

- Ⓐ. Department in charge of compliance
- Ⓑ. Executive Officer in charge of risk management
- Ⓒ. *Kansayaku*, who can respond to items at the director level.
- Ⓓ. Corporate advisor who serves as an outside contact point.
- Ⓔ. Department in charge of human resources designed to make reporting easier in cases of harassment starting fiscal 2017.
- Ⓕ. The president starting from May 2017, allowing employees to anonymously blow a whistle.

The direct phone numbers and email addresses are listed under the hotline menu on the top page of the internal website to further make the initiative widely known.

### Compliance hotline flow

## Customers

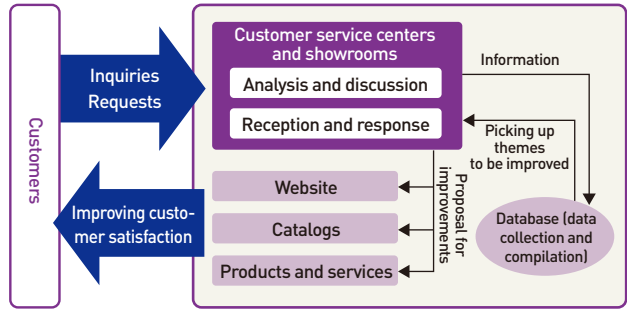

### Improving customer satisfaction

Information utilization system in response to customer voices.

We have customer service centers that listen directly to the opinions of our customers to gather feedback on what they think of our products. We would like to improve the trust customers place in us by responding quickly and sincerely to their honest opinions.

Information obtained through our customer service centers and showrooms is automatically collected and compiled into a database. We extract the essential information from the database and feed it back to the departments concerned. This system has proved effective in improving our website and catalogs and developing new products, thus resulting in even better manufacturing and services that answer the needs of our customers.

Flow showing how our customers' suggestions are reflected back into our products and services

### Quality Control

Enhancing quality through quality auditing and education.

We are working to strengthen our quality assurance system and ensure product quality and safety through quality auditing and education. We carry out internal audits for each department in the Daiken Group, product audits, and second-party audits for our OEM clients. These audits provide instructions on how to improve our quality management system (QMS). To disseminate the QMS, mutual internal audits are conducted by audit teams whose members include internal auditors from other departments.

In January 2017, external experts were invited to hold a lecture on the theme of adhesives, which are essential for building materials. Nearly 100 employees including those in charge of development joined to deepen their understanding about characteristics and assessment procedure.

The fourth lecture for the Quality Assurance Department

### Communication with customers

Active participation in exhibitions with an aim of increasing the awareness of our products for public spaces and commercial facilities.

In fiscal 2017, Daiken Corporation actively took part in exhibitions with the aim of increasing the awareness of our products for public spaces and commercial facilities. In addition to joining the Second Retail Premises and Facilities Exhibition held in Tokyo Big Site for the first time in October, our products were exhibited at the 45<sup>th</sup> International Hotel and Restaurant Show (Tokyo Big Sight) in February 2017, as well as the Japan Shop 2017 (Tokyo International Exhibition Center) in March. Daiken's products for hotels, inns, retail premises and offices, including noise-proof flooring with excellent design, wall materials with superior workability and easy-to-maintain tatami mats, were showcased at the exhibitions.

Moving forward, we will continue to actively propose products designed for public spaces and commercial facilities through exhibitions.

## Communication with suppliers

### Management policy briefing session for our business partners and suppliers.

Daiken Corporation holds management policy briefing session for business partners, suppliers, and logistics companies every year. For fiscal 2017, the briefing session was held on July 7 at Hilton Tokyo Odaiba by inviting 114 participants from 80 companies. President Okuda explained the corporation's directionality of the Medium-Term Management Plan, management policy for the fiscal year and prioritized measures. Other departments also shared their information to deepen cooperation.

In addition, on July 13, 33 companies were invited to the management policy briefing session at Hotel Granvia Okayama. The policy briefing sessions were also held by other departments all around the country.

Management policy briefing session for fiscal 2017

## CSR Procurement

### Survey for domestic plants and suppliers.

Starting March 2016, an online survey was launched on the status of CSR implementation by our business partners and suppliers. For fiscal 2017, the questionnaire was distributed to four domestic plants and 237 suppliers.

The survey results will be provided to the respondents. We will ask our suppliers to correct problems, or make necessary improvements if they continue to score low. Where necessary, we will ask them to submit a corrective action report where necessary.

We will continue to implement the survey to understand the actual condition to make improvements as part of our efforts to further promote CSR procurement.

# With the Society

## Employees

### Reduced long working hours

Self-improvement incentives are offered to promote the workstyle change.

At Daiken Corporation, the president declared a ban on working before 7 a.m. and overtime working after 8 p.m.\* Starting March 2017, the workstyle change project was launched and in May, the workstyle change promotion preparatory office was set by the General Affairs and Personnel Department with the goals of reinforcing the organizational structure and accelerating the effort toward realization.

For the summer bonus, full-time employees, contract employees, temporary employees, and full-time non-employees received ¥30,000 across the board as self-improvement incentives. This helps to give a boost to improved skills among personnel, consequently leading to the reduction of long working hours.

\*Personnel working directly for the plant department and shift workers are excluded.

A review meeting for promoting women's active participation  
(Office: Workstyle change promotion preparatory office)

### Work-life balance

Daiken Group acquired the “Kurumin” certification.

In May 2017, Daiken Group obtained the “Kurumin” certification, which the Ministry of Health, Labour and Welfare recognizes corporations supporting employees who are raising children. The Group has been making efforts to create a fulfilling work environment where each employee can work actively in good health, as well as to enhance the systems.

It is Daiken's commitment to continuously promote work-life balance and actively make efforts to create a work environment where employees can balance work with child raising.

### Occupational safety and health

Mutual safety diagnosis is implemented to improve the worksite capabilities.

On the premise of prioritizing safety above all, Daiken Group is working to maintain and improve a workplace environment that ensures safety without work-related injuries. With an aim of raising the level especially in production sites, the Daiken Group mutual safety diagnosis is implemented in four plants in Japan, seven group manufacturers and three overseas companies every year.

For fiscal 2017, Daiken sets key agendas of ensuring compliance with rules and improved worksite capabilities. The safety diagnosis was joined by worksite leaders, including unit head, shift leader and group leader, to focus on creating the structure of compliance with rules. For the future, Daiken is pledged to continue safety diagnosis according to challenges in worksites to create a safe workplace.

Worksite diagnosis for mutual safety checks

### Human resource development

Managers received training for promoting active participation of female employees.

To further promote active participation, Daiken Corporation believes it is important to change the awareness of managers who are supervisors for female employees besides themselves. To that end, for fiscal 2017, in addition to providing skill improvement training for female employees, managers who supervise female employees received diversity management training.

For future, Daiken Corporation is pledged to deepen the awareness and understanding of the necessity for all managers to promote diversity by continuing follow-ups for managers through training. We will aim to form a work culture that supports active participation of female employees.

# Shareholders and investors

## IR communication

Building a trustworthy relationship through IR activities, results briefing, and individual meetings.

In addition to holding annual meetings of shareholders (the end of June), Daiken Group holds presentations for financial results for investment analysts and institutional investors on a regular basis to explain about the outline of financial results and business plans. In addition, individual meetings are held quarterly by inviting institutional investors in consideration of mutual communication. Through direct dialog, we aim to reflect their expectations in our management.

Presentations for financial results

## Proper information disclosure

A renewed corporate website for better communication.

A new corporate website of Daiken Corporation was launched in June 2017. The updated page design helps various stakeholders to have a better understanding of the Daiken Group for better usability.

In addition, as an informative tool for IR, the business performance information is highlighted to offer enhanced stock information. We will continue to actively utilize the website to disclose unbiased information to shareholders, investors and other stakeholders.

IR website page

# Local community

## Sports promotion

By supporting the Soccer J1 Gamba Osaka, Daiken will contribute to promotion and activation of sports.

Daiken Corporation is an official partner of Gamba Osaka in the Soccer J1 League. We take part in sponsorship program for Gamba Osaka Academy aimed at nurturing soccer players for the next generation to support their activities.

In November 2016, we held a rally to encourage Gamba Osaka Youth (U-18) and Junior Youth (U-15) in cooperation with corporations and schools supporting the academy to boost exchanges with players and staff.

We will continue to support youth's dreams for the future through our sponsorship of the academy.

# For the Environment

## Medium-Term Environmental Plan

As part of our effort for realizing a recycling-oriented and low-carbon society, we are following goals to take actions towards them.

### 5<sup>th</sup> Medium-Term Environmental Plan (from fiscal 2017-2019)

Theme and content			Goal	Result
			Fiscal 2019 (Indicator BM: Fiscal 2015)	Fiscal 2017
<b>Eco-friendly products</b>	Contribution for achieving sales targets in the final year of the medium-term plan (fiscal 2019) by expanding eco-friendly products and their sales.	Development of eco-friendly products that contribute to reducing the environmental burden	Number of new products five items/year	6 items
<b>Contribution for building a low-carbon society</b>	Introduce carbon fixation by using wood.	Fixation through the supply of recycled wood boards	Volume of carbon fixation (CO <sub>2</sub> equivalent) 800,000 t-CO <sub>2</sub> /year  BM: 794,000 t-CO <sub>2</sub> /year (breakdown) MDF: 630,000 t-CO <sub>2</sub> /year IB: 164,000 t-CO <sub>2</sub> /year	777,000 t-CO <sub>2</sub> /year (breakdown) MDF: 633,000 t-CO <sub>2</sub> /year IB: 144,000 t-CO <sub>2</sub> /year
	Reduce CO <sub>2</sub> * emissions from energy sources. * CO <sub>2</sub> : emitted by the combustion of fuels or the use of electricity or heat supplied by a third party	Reduction of emissions by the domestic production sites	Discharge rate 62.5 (t-CO <sub>2</sub> /¥100 million) or below BM:69.7 (t-CO <sub>2</sub> /¥100 million)	62.2 (t-CO <sub>2</sub> /¥100 million)
		Promotion of energy savings through the introduction of energy-saving equipment and improvement of efficiency in equipment operation	Total emissions 110,000 t-CO <sub>2</sub> or below/year (CO <sub>2</sub> emission factor for electric power is fixed at the value of fiscal 2014) BM: 125,700 t-CO <sub>2</sub> /year (BM is the result in fiscal 2014)	105,100t-CO <sub>2</sub> (CO <sub>2</sub> emission factor for electric power is fixed at the value of fiscal 2014)
		Reduction of emissions from logistics and transport divisions	Unit of energy use 44.7 kl/1 million ton-kilo or below (reduction by more than 1% in annual average) BM: 46.6 kl/million ton-kilo (Reference: CO <sub>2</sub> emissions 23,700t-CO <sub>2</sub> /year)	48.4 kl/million ton-kilo
	Reduction of emissions from sales and administrative divisions Thorough implementation of energy-saving measures	CO <sub>2</sub> emissions 1,500 t-CO <sub>2</sub> or below (reduction by 10%) BM: 1,690 t-CO <sub>2</sub>	1,600 t-CO <sub>2</sub>	
<b>Contribution for creating a recycling-oriented society</b>	Promote the 3Rs* to reduce the volume of waste destined for final disposal. *Reduce, Reuse, and Recycle	Promotion of recycle and conversion of waste into valuables	Final disposal rate (ratio of volume disposed of in landfill outside the company) 5% or below BM: 8.2%	7.2%
	Introduce the cascading use of wood	Material recycle of construction waste wood	Ratio of old material/virgin material: 90% (Ratio of old material/virgin material BM: 86%)	92%
		Use of wood biomass energy (internal use)	Input amount of wood biomass energy 1,350TJ (116% compared to fiscal 2015) BM: 1,162TJ Use of fuel chip 95,000 t/year BM: 82,000 t/year	1,370TJ (118% compared to fiscal 2015)  97,000 t/year
	Promotion of shift to biomass energy and other eco-friendly energy from heavy oil, LNG, etc.	Reduction of heavy oil (heat quantity equivalent) 35,000 kl/year BM: 30,000 kl/year	35,000 kl/year	
<b>Contribution for biodiversity</b>	Procure wood in a biodiversity friendly way	Improvement in the rate of use of certified wood, domestically produced wood, planted trees, and recycled board, etc.	Use rate of non-certified natural plywood: 15% or below BM: 18.2%	15.1%
	Strengthen cooperation with supply chains	Dissemination and proper management of green procurement in the supply chain	Coverage of applicable companies (consent acquisition rate) 100%	99%
<b>Strengthen environmental risk management</b>	Identify, prevent, and minimize environmental risks	Operation and continuous improvement of environment management system  Environmental education	Environmental accident/violation 0	0
	Improve our ability to satisfy regulations governing chemical substances	Establishment and operation of a system for appropriate management of chemical substances (also considering introduction of a management system)	System operation	Introduced a management system and started operation with a new system.

## Reducing waste and recycling

### Current rate of recycling waste 91%

Daiken Group is striving to reduce and recycle waste in an effort to realize a sustainable society.

The waste emissions in the Daiken Group were 49,600 tons in fiscal 2017, and its recycling rate\*1 was 91.1%. We continue to improve the recycling rate.

\*1 Recycling rate = Amount of recycled resources/Total emission of waste x 100(%),  
Amount of recycled resources = Valuable + Use of materials + Use of heat

#### Breakdown of waste processing

## Contribution for realization of low-carbon society

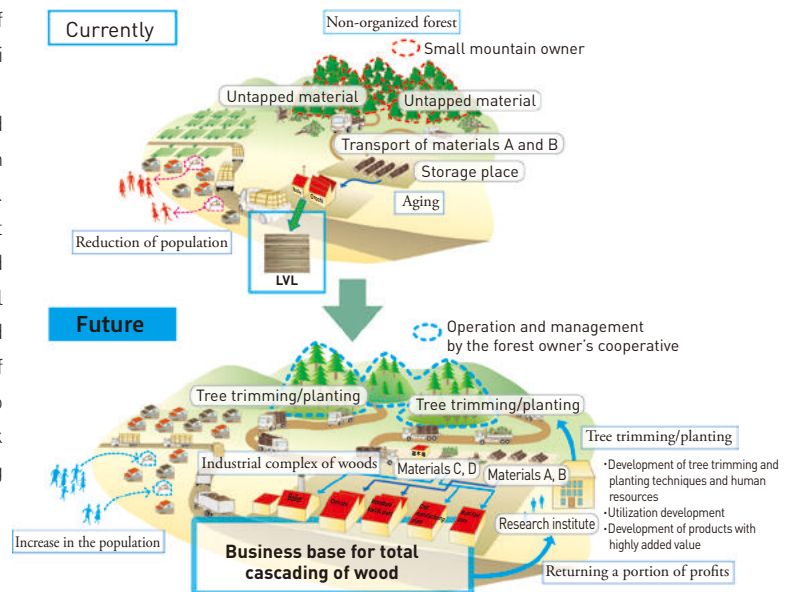

### Launched a project of total cascading of woods

In November 2016, we launched a project of total cascading of woods and started detailed discussion with Nichinan-cho in Tottori Prefecture, a forest owner's cooperative, and local companies.

This project is a new initiative for fully using local wood resources. It is part of an effort to realize total use of woods, which is one of the key measures of the Medium-Term Management Plan.

As the first business project, we developed a soil improvement additive DW fiber in collaboration with JCE Co., Ltd., and started making proposals since May 2017. The DW fiber is a soil improvement additive created by spreading domestically produced wood chips and adding fulvic acid\*, which facilitates the growth of plants. We will propose the product at a nationwide level to municipalities and contractors engaging in civil engineering work for additional soil needed for forming windbreak forest or greening slopes by spraying work.

\* Fulvic acid: A humic acid existing in forests and soils. It activates and promotes photosynthesis of plants. JCE Co., Ltd. is the owner of patents for technology to artificially generate fulvic acid.

# For the Environment **E**

## Effective utilization of recycled resources

Current rate of using recycled resources on products **64.2%**

The Daiken Group is committed to the effective use of wood resources and untapped resources in developing and producing its products, as part of its efforts to realize a recycle-oriented society,

In fiscal 2017, the Daiken Group's total resource input was 323,000 tons with the ratio of recycled resources used standing at 64.2%.\*

We will continue to maintain and improve this ratio.

\*Ratio of recycled resources = Recycled resources used in producing products / total resources used x 100(%), recycled resources used in producing products = Recycled resources + unused resources

## 1. Recycle of woods

### Fully using wood resources by refining its manufacturing technologies

The Daiken Group promotes the recycling of woods by promoting wood planting, appropriate use of forest trees, and recycling products that have been used once.

In particular, we have been working on the effective use of wood resources for more than 50 years. As a result, we developed manufacturing technologies to use chips and residual wood offcuts generated by demolishing buildings, which had been wasted before. The recycling rate of insulation board was increased to 90%. The product is lightweight and superior in heat insulation, moisture absorption-desorption, and cushioning properties, and its quality is also highly evaluated by the market.

#### Insulation board

Wood fiberboard uses waste wood generated from the demolition of buildings as ingredients, which is a procurement item specified in the Green Purchasing Law.

#### MDF

Wood fiberboard uses residual wood offcuts generated from the demolition of buildings as ingredients, which is a procurement item specified in the Act on Promotion of Procurement of Eco-Friendly Goods and Services by the State and Other Entities.

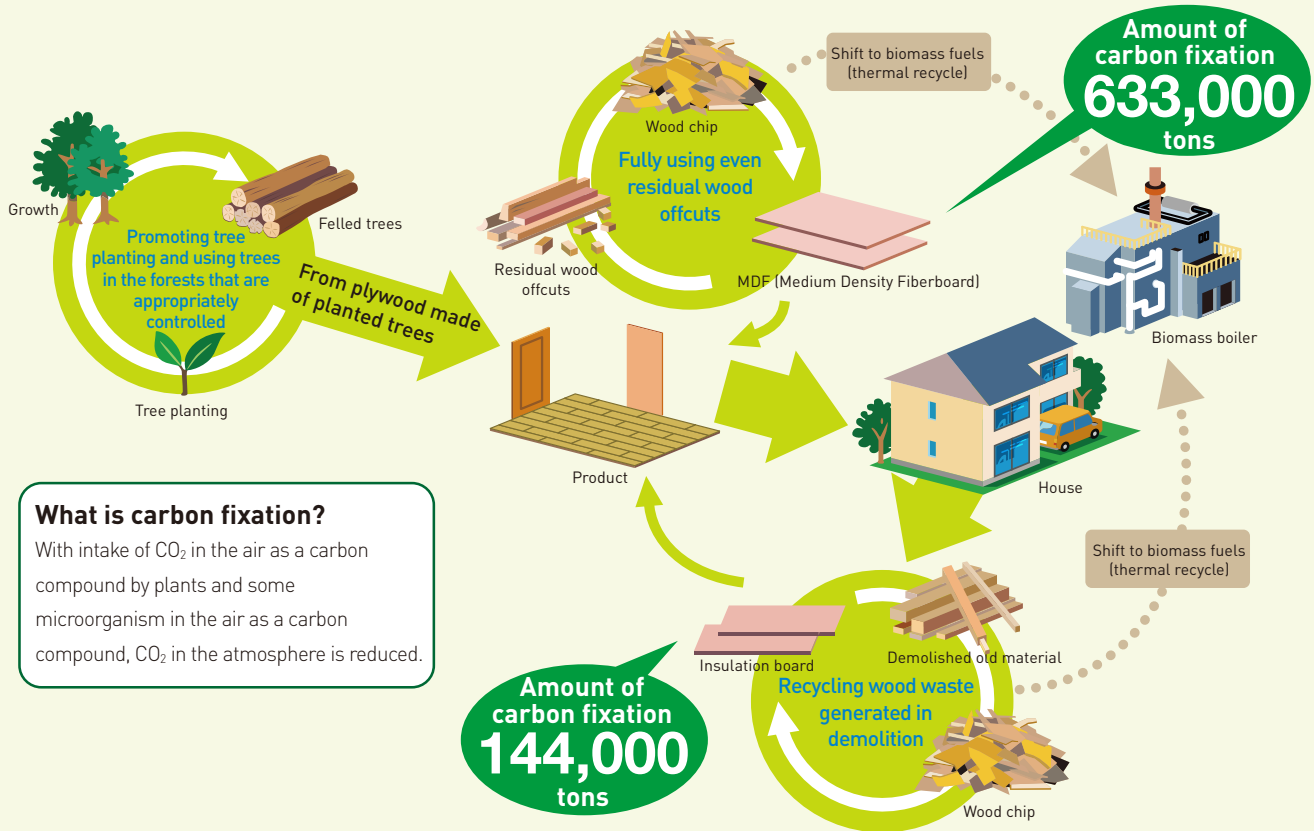

### Shifting the energy source in the manufacturing process to a wood biomass boiler

Daiken Corporation additionally installed a wood biomass boiler, which uses wood chips generated from construction wood waste, in its Okayama factory, which started operation from July 2016.

In the Okayama factory, there was a problem where the energy consumption of boiler used for generating heating steam

in the drying process was high. To address the problem, measures included the installation of a wood biomass boiler in 2007, and energy sources used for drying process using steam are now fully shifted to biomass energy. This will reduce annual CO<sub>2</sub> emissions by approximately 40,000 tons compared to that of 2006.

## 2. Effective use of untapped resources

### Commercializing mineral resources that were not used before with unique technologies

The Daiken Group commercializes byproducts produced in ironmaking, such as slag and *shirasu* (volcanic ash), which were not used before, with special processing to use them as ingredients. We are working towards a recyclable society by suppressing consumption of natural resources.

Further research is conducted to enable the product to demonstrate superior performance not only from an environmental perspective but also from a functional perspective, including non-combustibility and durability. It offers wide applications from the home domain to the industry domain, thereby contributing to society even more.

#### Dai-Lotone

The rock wool sound-absorbing board is manufactured using slag wool (fibered slag, which is a by-product produced in ironmaking) as raw material.

#### Dai-Lite

The inorganic panel is manufactured by making effective use of slag wool, a recycled material, and *shirasu* (volcanic soil), an untapped resource.

### Contribution for the promotion of earthquake resistance and local revitalization by ecological based materials

Daiken Corporation released Dai-Lite, the world's first material using *shirasu* as the main raw material, in 1997. It has grown and come to be renowned as a leading brand of inorganic bearing surface members intended for wooden houses and promoted anti-seismic houses.

Increasing the share of products using *shirasu* not only suppresses the consumption of natural resources but also contributes to local revitalization. For example, in the area in Kyushu where we collected *shirasu*, which is also a cause of debris flow, soil was improved, and now the area is filled with paddy fields. This is how we help revitalize local areas.

# 10-Year Summary of Consolidated Financial Data

	Fiscal year ended March 2008	Fiscal year ended March 2009	Fiscal year ended March 2010	Fiscal year ended March 2011
